

CHECKLIST FOR SWITCHING TO IMAGE APN® DENTURE TEETH

Beginning the process of transitioning to a new brand of teeth signifies a pivotal moment for any dental lab. The decision to integrate **Image APN®** denture teeth into your workflow represents a commitment to quality, durability, and exceptional patient satisfaction. This checklist provides you with a guide to assist you through a seamless transition, ensuring that your dental lab benefits from the advantages that Image APN® denture teeth bring to the table. From evaluating your existing inventory to aligning your team, *this checklist will steer you towards a successful transition, empowering you to create premium dentures case after case.*

1. Before You Begin

- Assess Current Inventory**
 - Take inventory of your existing denture teeth stock, noting quantities, shades, and types. This will help you plan your transition effectively.
- Team Training**
 - Identify if any additional training or education is required for your lab technicians to work with Image APN® denture teeth. Contact Zahn Dental for available resources or to speak to a consultant on how to prepare the team.

2. Transition Planning

- Create a Transition Plan**
 - Develop a clear timeline and strategy for transitioning to Image APN® Denture Teeth. Outline when you will start using Image APN® for new cases and when existing cases will be completed with your current inventory.
- Initial Image APN® Order**
 - Place an initial order for Image APN® denture teeth to ensure you have an adequate supply for upcoming cases.

3. Implementation

- Integrate Image APN® into Workflow**
 - Update your lab's workflow to incorporate Image APN® denture teeth, including any new techniques or processes required for seamless integration.
- Notify Your Team**
 - Inform your lab technicians and staff about the transition plan and provide them with any necessary training or guidance.

4. Handling Patient Cases

- Select Cases for Transition**
 - Identify cases that are suitable for transitioning to Image APN® denture teeth. Consider starting with cases where the benefits of Image APN® can be demonstrated clearly.
- Order Image APN® for New Cases**
 - For new cases, place orders for Image APN® as per your transition plan and incorporate them into your workflow.

5. Completing the Transition

- Phase Out Old Stock**
 - Gradually phase out your existing inventory of other denture teeth brands as you work through them, making Image APN® your primary choice.
- Regular Evaluation**
 - Periodically evaluate the performance and satisfaction of Image APN® to ensure they align with your lab's goals and patient needs.

By following this checklist, you can smoothly transition to Image APN®, ensuring a high-quality and efficient integration into your workflow while offering superior denture solutions to your dentists and their patients.
